1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on April 16, 2007 has been entered.

2. Claims 1, 4, 6-12 and 74-76 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, line 22, "said sealed metering tip" lacks antecedence because "sealed" has been deleted in line 15. Are these the same metering tips found in the tip retaining stations, or are they different tips? Is the tip stripping mechanism limited to stripping sealed tips into the tip retaining stations as disclosed, or does this limitation read on a conventional tip stripper used to discard used tips to a waste chamber? It is further not clear what is intended by "configured to retain..." in claim 1, lines 16+, since sealing is the only method of configuration for this function that is disclosed. Does this read on unsealed tips? Claim 76 as amended does not make logical sense because there is now only one set of tip retaining stations claimed, and "the sealed metering tips" lacks antecedence for the same reasons as stated with respect to claim 1.

3. Applicant's arguments, filed April 16, 2007, with respect to the rejections of record have been fully considered and are persuasive. The rejection of claims over the prior art has been withdrawn.

Art Unit: 1743

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

USP 6,267,927 shows a tip discarding hole 37 in a housing holding tips, but the tip retaining stations are not covered and the tip stripper is not located *in* the cover.
